Environmental Management Policy

Manaco identifies its social and environmental responsibilities as key areas of concerns in developing the company as a responsible corporate individual of Sri Lanka. The company has developed an environmental policy with a view of minimizing the environmental impacts cause by its business activities and enhancing environmental quality. Manaco environmental management policy statement is based on following principals.

1. Comply with the legal frame work of the country considering all applicable laws, regulations an international agreement while ensuring health & safety of all its stakeholders including the society in general and the environment;
2. Promoting the environmental policy and practice within the company;
3. Setting and consideration of environmental goals;
4. Saving resources and maximum energy efficiency;
5. Minimization of vehicle emissions of pollutants;
6. Waste minimization wherever possible;
7. Increasing the environmental awareness of employees and contractors;
8. Promoting good environmental practices both at organisation and individual levels;
9. Communicating effectively with stakeholders about our environmental performance;
10. Continuous improvement of environmental performance.

As a company Manaco, remains mindful of the impact on the environment and would move strongly towards the ultimate goal of becoming a sustainability influencing pillar to other business of Sri Lanka as well.

This policy shall apply to all of Manaco, including its properties, business units, employees, and contractors serving our portfolio.
